

→ your service doesn't depend on dto obj

- Controllers should be dumb.
- 
- No business logic

→ Controller may do validations of existence of param.

@ NotNull.

Params as Obj

Not DTOs

Service (      ) {  
  
}

Ticket Service

bookTicket (a, b)

~~int a = 1~~

int  
→ b = a + 9

c = b - 3

return c + 2

bookTicket (7, 3)

(b)  $7 + 9 = 16$

c = 13

return 29

bookTicket (7, 3)

@Autowired

if you put autowired annotation over a method, it tells Spring to automatically create obj of those classes and pass them
